Professional profile

Multiplatform Application Development (DAM) student primarily focused on backend development and software architecture, with flexibility into other technological areas. Proactive, independent, and accustomed to developing personal projects to master new technologies and methodologies.

Work experience

- **Junior Developer Intern – Ventura Espejo (January - March 2025)**
 - Collaboration in the development of business logic and optimization of SQL queries.

Projects

- **LinkWeaver:** Design and development of a concurrent web crawler optimized for efficient data extraction and storage in JSON format. It is currently being expanded into a search engine.
- **MuuMe:** A web-based messaging application built with Spring Boot that features message persistence and encryption to help protect user privacy. Currently under development.

Studies

- **Higher Technician in Multiplatform Application Development (DAM)**
 - Gran Capitán | In progress
- **High School Diploma in Technology (Bachillerato Tecnológico)**
 - Felipe Solís Villechenous | 2023 - 2024

Skills and languages

- **Back-end:** Java, Spring Boot
- **Front-end:** HTML, CSS, Astro, TailwindCSS
- **Databases:** Oracle SQL, PostgreSQL
- **Tools and API:** IntelliJ Idea, VSCode, Postman, Git, GitHub, Docker, REST APIs
- **Systems and Environments:** Windows, Linux (daily drive environment)
- **Languages:** Inglés B2 (Official certificate) | Spanish (Native)
